TECHNICAL COMPONENTS WITH UNLIMITED POSSIBILITIES

PUX®

The intelligent solutions made of polyurethane are also resistant to water and moisture, heat and cold. PUX® products can be individually adapted to satisfy every requirement.

We make wood even stronger – with PUX®

We combine the two materials wood and PUX® allowing their properties to optimally complement each other – with maximum precision under minimum tolerance. With its remarkable properties, PUX® is a winner in virtually every area of application: the multifunctional rigid foam is not only versatile and durable but also recyclable.

One company, many competencies

With us you receive all services from a single source – from the formula to the production and the logistics. Our PUX® components are exclusively produced by Holz Pichler.

BENEFITS

- + easy to work - like wood
- + hard and mechanically strong
- + water resistant
- + flexural strength
- + excellent screw extraction resistance
- + perfectly suitable for almost all types of adhesives
- + mould & rot resistant
- + chemical & corrosion resistant
- + temperature resistant
- + flame retardant
- + various densities possible
- + long-lasting
- + odourless
- + recyclable

+ Straightforward like us:
simplify your ordering process with EDI (electronic delivery interface).
